 - Java, JavaScript, C#
 - HTML5, CSS3, Python
- GitHub
- Unity, with personal project
- Appian
- Front-end and back-end web development.
- APIs
- Application development

More information

- Driving licence - Type B
- Immediate availability and willing to change location if necessary.

About me

Computer engineer with experience in web development, automation, and creating digital solutions aimed at improving and optimising businesses.

I have designed and implemented booking systems, online shops, and web experiences with a minimalist approach and high visual impact.

I am currently developing my own application to apply my knowledge of automation and software architecture to a real-world case with Appian.

Work experience

Application - Appian

Currently building workflows, rules, and interfaces to automate processes | Modelling data and designing forms to reduce manual tasks |

January 2026 - Present

LUMBRE - Restaurant - Online Shop

I developed a minimalist and responsive website for a restaurant | I implemented a booking system and integrated online shop |

May 2025 - November 2025

Video game development - Extreme Football

I programmed game mechanics, physics and collisions |

I designed the logic, interface and complete flow of the game |

November 2023 - May 2024

Front-end developer

VSN Innovation & Media Management Solutions |

Internship contract |

November 2023 - February 2024

I ran tests and validations in TypeScript

Academic data and courses

Degree, **Computer Engineering**

University of Alicante | September 2019 - July 2024

B1 Preliminary

Cambridge University Press & Assessment English | 2023

Mobile App Development, Course

Google Get Active | November 2024
